

Voice on the Go Available on Jawbone ICON Bluetooth Headset

Toronto, Ontario – August 17, 2010 –Voice on the Go®, the world leader in hands-free email and texting by voice, has announced that Jawbone® ICON™ users can now connect with the [Voice on the Go](#) application using Jawbone’s [MyTALK](#) software platform. With a simple push of a button on Jawbone ICON, users can email, text, and call while using Voice on the Go’s hands-free technology.

There is tremendous global awareness of the dangers of texting while driving. Voice on the Go provides a complete hands-free voice application when used with a Jawbone ICON so users can do more with their voice, while keeping their hands on the wheel and eyes on the road. The Voice on the Go application allows users to listen to email; compose, reply and forward email with voice-to-text™; delete email by voice; send text messages using voice-to-text; call any of their contacts by name; update Facebook and Twitter by voice; and use Bing 411* to find traffic directions and updates, weather, news and sports, stock quotes and more.

Voice on the Go works with all cell phones on any carrier network and is available in 60 countries in English, French and Spanish. Voice on the Go is easy to set up with no voice training and features state-of-the-art voice recognition, voice-to-text and text-to-speech processing.

“The MyTALK platform is designed to give people the flexibility to customize their experience with Jawbone ICON,” said Travis Bogard, Vice President Product Management and Strategy at Aliph. “We’re excited that Voice on the Go has become one of the latest offerings to join the platform, providing users with more ways to stay hands-free and use the power of their voice for email and messaging.”

“The innovative Jawbone ICON Bluetooth headset with the MyTALK platform is perfectly matched for Voice on the Go’s hands-free email and texting voice solutions,” said John McLeod, CEO, Voice on the Go. “The combined technology enhances the hands-free mobile lifestyle and provides for a safer consumer experience when driving.”

About Voice on the Go
